DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The most relevant prior art to the instant application are the prior art references of Burroughs et al. (USPN 6,580,846) and the parent application of the instant application which has matured into US Patent Number 6,813,406 to Hatam-Tabrizi et al.
4. Regarding the Burroughs et al. reference, the main reason for allowance over the prior art, including Burroughs et al., is that the prior art fails to teach, either explicitly or implicitly, a system and method of reducing oscillations in an optical switch having a plurality of input/output optical signal mirror actuators where a cost function is used to iteratively reduce the number of oscillations in the optical circuit as recited in claims 1, 9, and 16. Claims 2-8, 10-15, and 17-21 are allowable over the prior art, including Burroughs et al. by virtue of their dependency.
5. Regarding the parent application of the instant application which has matured into US Patent 6,813,406 to Hatam-Tabrizi et al., the main reason for allowance over the Hatam-Tabrizi et al. reference, taken alone and with the prior art, is that the reference fails to teach or suggest the method and system for reducing oscillations in an optical switch. The primary concern when analyzing the parent case has been to discern if there is a Double patenting rejection present. Since the claim language fails to explicitly recite the system and method

of the instant application, and further does not suggest an obvious Double Patenting type rejection is appropriate, the instant application is allowable over the Hatam-Tabrizi et al. reference.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
